

BluePrint Ceramics Philosophy is to bring our clients the highest quality ceramic and porcelain tiles whilst at the same time not compromising our responsibilities to the environment and the focus being on further sustainability.

To achieve sustainability is imperative for BluePrint Ceramics to source only products that make the lowest possible impact on the environment. We take into account the cost of waste and waste disposal and also the impact of emissions during the process of production.

BluePrint take time and care in sourcing products that are produced using carefully prepared technologies and procedures that meet the requirements of a future world where we consume less, pollute less and waste less.

BluePrint Ceramics products are highly durable, the products are not susceptible to the elements such as light and temperature which means a long-lasting product.

Our products are sure to meet ecological standards that mean they are low impact on the environment, high performance for our clients and visually aseptically pleasing.

BLUEPRINT AIM TO SOURCE PRODUCTS THAT:

- *Do not use harmful raw materials, glues or resins.
- *Use material from quarries with strict quality controls.
- *Recycle as many resources possible during the production process
- *Where emissions and environmental impact have been considered.
- *Where health and safety of site and workers have been considered
- *Where continued improvement of processes and the impact on the environment are practised.
